

**THIS SURVEY MUST BE COMPLETED AS PART OF YOU MEMBERSHIP APPLICATION**

Hampshire Astronomical Group has one of the largest amateur astronomical facilities in the UK. We have five domes with superb telescopes ranging from a 5 inch refractor built in the 1890's to a 24 inch, computer-controlled, reflecting telescope which is one of the biggest telescopes in southern England.

These facilities do not maintain themselves, and we welcome participation from all members, male and female, who wish to help with the upkeep of the equipment, assistance with visits, and general administration. If you choose to help, you will learn a lot about the telescopes and domes, how they work and how to use the equipment. You do not necessarily need lots of expertise, - though we can certainly make use of experts in any of the fields in the survey below.

I would like your help in completing this simple survey. Your willingness to participate fully in keeping the group running will have a bearing on the success of your application.

**HAMPSHIRE ASTRONOMICAL GROUP SKILLS SURVEY**

Major Tasks	Things we need to do	Willing to help?	Skills we need	Your Level of Skill
